SANJAYA POKHREL

BCA student and Full Stack Developer

+9779840251889 sanjayapokhre141@gmail.com londaka sanjaya-pokhrel-9906ba285
Kathmandu, Nepal

PROFESSIONAL SUMMARY

BCA student and **Full Stack Developer** with hands-on experience building web applications using **React.js, Node.js, Express.js, MongoDB, TypeScript,** and **REST APIs**. Experienced in frontend development, backend API design, validation, authentication, database operations, error handling, and deployment. Strong problem-solving skills with a focus on writing maintainable, production-oriented software.

WORK EXPERIENCES

Full Stack Developer Intern
2025 - 2026

MavTech — *Kathmandu, Nepal*

- Developed and maintained full-stack web application features across frontend and backend.
- Built responsive and reusable **React.js** components and integrated **RESTful APIs** for interactive application features.
- Developed and maintained **Express.js** APIs, including request validation, authentication, error handling, and database operations.
- Participated in feature implementation, testing, deployment, and maintenance within the software development lifecycle.

Technologies / Skills Used : *React.js, Node.js, Express.js, REST APIs*

EDUCATIONS

Tribhuvan University | Kathmandu, Nepal
2021 - 2026

Bachelor of Computer Applications (BCA)

National Examination Board
2019

+2 Science / Management — *Percentage : 3.0*

PROJECTS

E-Commerce Web Application
2023 - 2024

Personal Project

- Planned, designed, and developed a full-stack **online store**, encompassing frontend, backend, database, and API functionality.
- Implemented product management, user authentication, shopping workflows, and **RESTful backend services** using the MERN stack.
- Integrated **eSewa payment gateway** for online transactions, effectively handling API documentation and payment-related requests.
- Utilized **MongoDB** for application data storage and **Cloudinary** for product image management and delivery.

Technologies / Tools Used : *MERN stack, MongoDB, Cloudinary*

TaskFlow API

Backend Project

- Built a modular **REST API** for project management using **JavaScript** and **Express.js**, following a structured approach with controller, service, and repository-layer separation.
- Implemented request validation with Validator and centralized application error handling using custom errors and HTTP status codes.
- Developed workflows for project creation, retrieval, and updates, incorporating duplicate-resource and not-found handling.
- Designed the backend with a focus on maintainability and database-backed persistence, including validation and error-handling patterns.

Technologies / Tools Used : *JavaScript, Express.js*

SKILLS

Databases :	MongoDB, MySQL
Frameworks & Libraries :	React.js, Tailwind CSS, Node.js, Express.js
Programming Languages :	JavaScript, TypeScript, HTML5, CSS3, PHP
Soft Skills :	Problem-solving, Agile, Scrum
Tools & Platforms :	Git, GitHub, VS Code, Postman, Figma, npm

CERTIFICATIONS

- **Computer Networking**, **IT Training Nepal**, 1-month intensive programme
- **Full Stack Web Development**, **MavTech**
